Battery Lock

- This efficient form of vibration transfer prevents cavities and bubbles forming in the adhesive. In turn, this ensures a perfect bond between the tile and adhesive
- Very handy, light tool with optimum operating comfort
- Brushless motor and Electronic Management System (EMS)

Despite vibrations, the locking mechanism reliably keeps the battery pack connected to the machine.

Integrated speed control for optimum adaptation to material and format

With a Ø 120 mm vibration plate, suitable for large-format wall and floor tiles

FLEX battery system

The patented Proformance battery system with XLITHIUM POWER delivers on its promise!

Long run time, long service life, long maximum performance. Only from FLEX: With the patented cooling system, FLEX delivers optimum tool and the battery cell protection. The battery management system controls the permanent data exchange between the tool, battery and charger so that all parameters are optimally set. This ensures power when the battery and tool are working together, and allows you to use them without energy loss.

The smart technology controls and monitors both tool activity and charging, and uses the LCD display to show the battery charge level.

The unique, integrated cooling system ensures constant temperatures even under heavy loads. Only for 18 V battery packs.

Superior power thanks to high-performance lithium-ion cells.

No self-discharge.
No memory effect.

Low-wear and brushless motor with EC technology for greater running performance, more power and a longer service life.

Battery chargers and lithium-ion battery packs

Battery packs with built-in charge/discharge protection.
Dustproof and splashproof. Built-in charge status indicator
offers an instant check of battery cell charge levels.

Maximum dust protection on the construction site

Construction site air cleaner VAC 800-EC

Watch the video!

Work with negative pressure in the working area

A sluice should be installed to prevent dust from migrating into the environment outside the working area. The cleaned air is discharged from the working area via a hose or is fed back into the working area as cleaned air.

Very efficient

Significantly reduces the pollutant load in rooms up to 100 sq. m within a short time.

Very handy

No installation required. Set up, switch on – clean air. Filter changed without using tools.

Low overheads

When used properly, the HEPA 14 filter can be used for up to one year. The VAC 800-EC air cleaner is specially designed for continuous operation and impresses with its very low power consumption.

Whisper mode

In special Night mode, the sound pressure level is only 38 dB (A). This means that the operating noise falls below the concentration disturbance threshold and is therefore also ideally suited to places such as classrooms.

Light weight

Weighing just 7.2 kg, the VAC 800-EC is the quietest in its class, and this makes it easy to move.

Robust construction

Specially designed for extreme conditions on construction sites. The VAC 800-EC is very robust and boasts an impressive long service life.

Toolless 'Top Change' filter change

Thanks to simple operation of the quick-action clamping lever. Prevents unnecessary contact with spent filter cartridges.

STACK PACK™

Your mobile workshop for maximum flexibility!

Discover the STACK PACK™, the ultimate toolbox system for professionals! No more tedious lugging from site to site - with this modular tool trolley, you can transport your equipment safely and in an organised way. Thanks to the stackable transport case system, your tools are always to hand and perfectly organised.

Whether you're a carpenter transporting an extensive collection of woodworking tools, an electrician who needs to store cables, switches and sockets or a plumber who needs secure storage for pliers and fittings - the STACK PACK™ makes tool organisation easier and provides efficient tool storage on the construction site. Painters and varnishers also benefit from this flexible transport solution for safely carrying power tools, brushes and accessories from job to job.

Mixing paddles

Description	Designation	Ø	Mix	Connection	Order No.	Price excl. moms
 Bitumen stirrer BP Suitable for very viscous materials with high adhesion thanks to its hooked shape. The parallel mixing effect prevents lumps from forming and air being stirred in. Ideal for bitumen and bituminous, fibrous compounds. Durable and long-lasting thanks to powder coating.	BP 160x600 M14	140 mm	130 kg	M14	534041	349,00
	SP2 100x600 M14	100 mm	130 kg	M14	534023	257,00
 Spiral paddle mixer SP Two negatively arranged discs press the mix downwards, preventing liquid material from spraying out. Ideal for liquid to viscous material: Paints, dispersions, varnishes, glazes, coatings, pastes, bitumen. Durable and long-lasting thanks to powder coating.	SP2 120 x 600 M14	120 mm	20-40 kg	M14	534024	277,00

 Helical paddle mixer HP3R Three right-handed spirals screw themselves into the material. Even heavy and viscous materials can be mixed quickly and intensively with little effort. Also known as a mortar or heavy-duty mixer. Ideal for: Mortar, concrete, plaster, screed, bonding agents, thick coatings. Durable and long-lasting thanks to powder coating.	HP3R 120x600 M14	120 mm	15-25 kg	M14	534030	400,00
	HP3R 140 x 600 M14	140 mm	20-40 kg	M14	534031	451,00
	HP3R 160 x 600 M14	160 mm	30-60 kg	M14	534032	513,00
 Helical paddle mixer HP3L Three left-handed spirals press the mix down into the hopper. Settled pigments, solids or fibers are rinsed up and evenly mixed. The mix does not splash. Ideal for liquid and creamy mixes: Paints, emulsion paints, gypsum plaster, casting compounds, materials containing fibers. Durable and long-lasting thanks to powder coating.	HP3L 120x600 M14	120 mm	15-25 kg	M14	534033	400,00
